ACHIMA GUSTAFSSON

Entry level Frontend Developer

A goal-oriented entry-level frontend developer with a background in the hospitality industry. In recent years, I switched careers and finished my studies in media production at Blekinge Institute of Technology. Although I'm new to frontend development and design, I'm enthusiastic about creating user-friendly websites and eager to learn and excel in this industry. I'm actively looking for opportunities in frontend development and UI/UX design. I'm open to internships to gain practical experience and enhance my skills.
